

More than text alone

- graphics
- navigation
- fields
- intelligence

The calculator demo

Combining $\text{T}_\text{E}\text{X}$, METAPOST, **PDF** and JAVASCRIPT.

Just a few examples

- **in-line fill-in fields**
- **parents, children, clones and copies**
- **field characteristics**
- **entering $\text{T}_\text{E}\text{X}$ text**
- **all kinds of fields**
- **advanced references**
- **popping up information**
- **and some more**
- **figures and fields**
- **and more of those**

Some new concepts

- reusing objects
- selective inclusion
- one pass dilemma
- generating datastructures

Advanced referencing

Just some alternatives,

```
\goto[reference]
```

```
\goto[outer reference::]
```

```
\goto[outer reference::inner reference]
```

```
\goto[operation(argument)]
```

```
\goto[operation(action{argument, argument})]
```

```
\goto[action]
```

```
\goto[action{argument}]
```

... chained or not.
