

The future of pdfT_EX

Quit

The current state of pdfT_EX

- PDF backend
- typographic extensions

Quit

PDF backend

- fonts: Type 1, TrueType, Type 3
- graphics: PNG, JPEG, TIFF, PDF
 - hypertext
 - hooks for low-level access to various PDF features

Non-PDF extensions

- marginal kerning
 - composing with font expansion

Further development

- The PDF backend
 - fix known and/or found problems
 - supply hooks to access (new) features of PDF
 - add reasonable extensions for further experiments
 - Typographic extensions
 - simplify the current implementation
 - separate typographic extensions from PDF backend
 - investigate further details of composition?
