$\text{T}_{\text{E}}\text{X}$ Live is by common consensus the easiest way to get up and running with $\text{T}_{\text{E}}\text{X}$. It provides a ready-to-run $\text{T}_{\text{E}}\text{X}$ system for most types of Unix, MacOS X, and Windows, and includes all major $\text{T}_{\text{E}}\text{X}$ -related programs. It also includes a complete tree of fonts and macros, with support for many languages (from: <http://www.tug.org/texlive>).
